FOR IMMEDIATE RELEASE

POLAR TRAILER INCORPORATES NEW FEATURES & ADDS ACCESSORIES TO 2007 UTILITY TRAILER LINE

MINNEAPOLIS – JUNE 1, 2006 – Polar Trailer announces several product improvements and the addition of new accessories to its lineup of off-road utility trailers.

+ Pass-Through Axle

For 2007, all HD and Woodsman Trailers will come standard with Polar Trailer's exclusive Pass-Through Axle. An impressive 12-inch ground clearance meets or exceeds that of most ATVs and off-road utility vehicles, allowing for ease in towing and hauling over virtually any terrain. Pass-Through Axles are constructed of heavy-gauge powder-coated steel with zinc-coated hardware.

+ Tandem Walking Arm™

Sometimes two wheels just aren't enough. Polar's Tandem Walking Arm™ converts any single-axle Polar Trailer into an extra-stable workhorse. Heavy-duty welded steel brackets straddle each end of the axle to distribute weight evenly over all four wheels for incredible towing smoothness, even with top-capacity loads. Tandem Walking Arm Kits are sold in pairs and are compatible with Polar HD and Woodsman trailers.

ABOUT POLAR TRAILER
